

Petition to the Morelia Zoo Director in Mexico, to consider to allow Yupi, the Polar bear living there, to be relocated to a better facility!

We the undersigned, urge you to consider allowing Yupi, to be relocated to a better facility!

Yupi the polar bear has spent all her life in captivity in a barren concrete enclosure at the Zoo. During summer time, she has to endure up to more than 36 C, she has no place where to protect herself from the sun, except the tiny space by the entrance to her sleeping area. Her pool is not cooled down, her fur is covered with green algae and she is already showing several stereotypic behaviors, related to stress and frustration.

Zoocheck Canada, CATCA, ACWF, Born Free UK and the Mexican Green Party want to relocate Yupi to a better facility, with more natural and better climatic conditions. Please, consider this opportunity for Yupi, to end her days in a more natural environment, a better climate and in more humane conditions.
